

Replacing ABB TESSELATOR 9800 color graphic systems!

Newcon Data AB is pleased to announce the new software product **TessEm⁹⁰⁰⁰** that emulates the ABB TESSELATOR 9800 family of high-end, super high performance multi-channel color graphics display system.

The product **TessEm⁹⁰⁰⁰** is fully compatible with the TESSELATOR 9800 product family and will run on any PC platform with Windows Vista, Windows 2000 or Windows XP operating system installed.

This is the first emulator available at the market that can replace a TESSELATOR 9800 system, including X.25 communication and multi-displays, without any need to change or modify the host application. The product uses standard TESSELATOR symbol libraries to achieve the same “look and feel” as the original TESSELATOR 9800 system.

By using the product **TessEm⁹⁰⁰⁰** there is no need to worry about lack of spare parts or unavailable monitors, as any CRT, TFT or Plasma type display compatible with your choice of PC can be used. And of course the original TESSELATOR keyboards and trackballs can still be used.

More information about the **TessEm⁹⁰⁰⁰** product can be found at the product website <http://www.tessem.nu/>

For price, orders and delivery time please E-mail us at sales@newcon.se

The product could directly be used together with all host computers using the TESSELATOR 9800 as graphic operator interface.

Newcon Data AB

Newcon Data AB has extensive expertise in man-machine communication interfaces (MMI), real-time programming and embedded computer systems and provides advanced technical services for development of embedded computer systems and new MMI systems.

The employees at the company have extensive knowledge, 29 years of experience, of the TESSELATOR product family (7000, 8000 and 9800) since they have been part of the development teams for all the models. The company has undertaken additional projects related to the TESSELATOR products, as the windowing functions in the TESSELATOR 9800 system.

Newcon Data AB has been handling the maintenance, administration, technical support and new software development on the TESSELATOR product family for ABB Automation Technologies AB since 1991.
